

# Environmental Policy

APS Metal Pressings Ltd. is a contract presswork company, manufacturing pressed components and welded assemblies in ferrous and non-ferrous metals.

Environmental issues will be given equal priority within the business management system of APS Metal Pressings Ltd.

The Management of APS Metal Pressings Ltd. will commit the resources necessary to ensure everyone connected to the business understands their environmental responsibilities.

The company will provide such training and instruction as is necessary to ensure each person clearly understands their role and responsibilities.

The company commits to:

- Fulfil all relevant current legislation and other identified obligations
- Review the environmental impacts of all activities annually.
- Ensure continual improvement of the overall environmental performance by setting objectives and targets and by monitoring performance and auditing.
- Select contractors to help achieve the outcomes of the EMS
- Prevent pollution.
- Train and involve all employees/visitors in the environmental programme and address the needs of its stakeholders.
- Promote the achievements of the EMS
- Measure and document its environmental performance using appropriate monitoring systems.
- Minimize the release of air emissions and noise through prudent control measures.
- Ensure life cycle perspective is considered.
- Minimizing risk of land and water pollution through preventative measures.
- Reduce energy consumption through energy efficiency measures.
- Minimize waste as far as reasonably practicable & control the handling of waste.

The Managing Director is responsible for this policy and the overall management system. The Board of Directors, have committed the resources to establish and maintain a procedural management system that will achieve ISO 14001 certification and to manage the environmental objectives and Management Action Plans that are set and reviewed annually.
